MILK AND FOOD TRANSFER TANKERS:

These tanks can be manufactured both insulated or none insulated. Beginning from 1.000 liters volume, tanks can be manufactured up to 30.000 liters volume. Tanks' shapes are elliptical or cylindrical. CIP head, purger system with check valve and outlet valve are standart equipments. On top, compression type manhole lid is placed. Gasket is stabilized to lid with a special lock system. And polyurethane chemical is injected between jackets as an insulation material. In this way, product temperature is fixed for long periods of time.
